

ED-1505 - Add User role for Functional Area Admin (FA Admin)

- **Purpose:**

Introduce a new user role called FA Admin that enables users to manage deliverables and templates across all functional areas (EE, ME, THM) within the Admin > Deliverables & Template Management module.

FA Admins can also add/remove users in User management, limited to the following roles: EE, ME, THM, ODM EE, ODM ME, ODM THM.

- **Role Name:** FA Admin

- **Role Scope:**

- Manage deliverables and templates across all functional areas (EE/ME/THM).
- Add/remove users (limited to EE, ME, THM, ODM EE, ODM ME, ODM THM).
- Cannot manage Administrator, DM, or PjM users.

- **UI Integration Points**

- The FA Admin role should be available in the following screens:

1. Admin > User Management > Role Dropdown (Search Section)
2. Admin > User Management > Edit Icon (Action Column) > Edit User Popup > Role Dropdown
3. Admin > User Request Management > Request Roles Dropdown (Search Section)
4. Admin > Role Management > Search Bar
5. Admin > Role Management > Edit Icon (Action Column)

- **Permissions Matrix**

Feature / Action	FA Admin
Create/Edit/Delete Deliverables	Yes
Upload/Download Templates	Yes
Add/Remove Users (EE/ME/THM/ODM EE/ODM ME/ODM THM roles)	Yes

Add/Remove Admin, DM, PjM Users	No
Assign FA Admin role to DM user	No
Assign EE/ME/THM roles to DM user	Yes
Access Admin > Deliverables Management	Yes
Access FA Readiness Dashboard	Yes
Download Past Template Versions of Deliverables	Yes

Deliverables & Template Management

Jira ID -

Search Section	Functional Areas- Deliverables & Template Management Screen, Task deliverable details table
Task Deliverable details table	Functional Areas - Deliverables & Template Management Screen, Task Deliverable details table Inbox
