

Functional Area Deliverable - Option Management for "Phase"

Admin users need a screen Admin > Option Management to manage the field "Phase" where Admin users can define the options a user will see when filtering.

User needs to be able to add phases for user to select in deliverables management.

Associated Impact to:

[ED-1080](#) - Deliverable and template management adding a new deliverable will assign it to a phase.

[ED-1087](#) - In deliverables technical screen user needs to be able to select the phases to display for deliverables to be completed.

Each Functional area will need to be able to define phases

- EE - Phases
- ME - Phases
- THM - Phases

When user enters edit mode - pop-up will appear allowing user to

- add new value
- select/deselect is default value
- change order
- activate/inactivate values

Default Phase Values

- **EE-Phase:** X01, X02, X03, A00, User defined
- **ME-Phase:** Mockup release, Tooling release, T2 release, TF release, RFD release, PPAP, User defined
- **THM-Phase:** User defined
