

Add User role for Functional Area Admin (FA Admin)

As a system administrator, I want to introduce a new user role called **FA Admin** so that designated users can manage deliverables, templates, and user access across all functional areas (EE, ME, THM) without having access to higher-level roles like Admin, DM, or PjM.

Description:

The **FA Admin** role is designed to streamline cross-functional deliverable and template management within the **Admin > Deliverables & Template Management** module. FA Admins will also have limited user management capabilities, allowing them to add or remove users in specific roles (EE, ME, THM, ODM EE, ODM ME, ODM THM), but not higher-level roles such as Administrator, DM, or PjM.

This role should be integrated into the following UI components:

1. **User Management > Role Dropdown (Search Section)**
2. **User Management > Edit User Popup > Role Dropdown**
3. **User Request Management > Request Roles Dropdown**
4. **Role Management > Search Bar**
5. **Role Management > Edit Icon (Action Column)**

Permissions Matrix

Feature / Action	FA Admin
Create/Edit/Delete/Download Deliverables	Yes
Upload/Attach Templates	Yes
Add/Remove Users to Functional Area	Yes
Add/Remove Admin, DM, PjM Users	No
Access Admin > Deliverables Management	Yes
Access Readiness Dashboard	Yes
Download Past Template Versions	Yes

Role Availability

- FAAdmin role is listed in all relevant dropdowns and search bars in Admin, user management and role management pages.
 - Admin > User Management > Role Dropdown (Search Section)
 - Admin > User Management > Edit User Popup > Role Dropdown
 - Admin > User Request Management > Request Roles Dropdown
 - Admin > Role Management > Search Bar
 - Admin > Role Management > Edit Icon (Action Column)
- FAAdmin role is selectable when editing or assigning roles to users (except Admin, DM, PjM).

General Permissions

- FAAdmin can assign roles: EE, ME, THM, ODM EE, ODM ME, ODM THM, FAAdmin
- FAAdmin **cannot assign** roles: Administrator, DM, PjM

Special Case: DM Users

- When editing a user with role **DM**, FAAdmin:
 - Can** assign: EE, ME, THM
 - Cannot** assign: FA Admin, Administrator, PjM

Permissions Matrix

Feature / Action	FA Admin
